

a stitch in time

Advanced Product Quality Planning

Forewarned is forearmed.

Thus goes the famous saying. Quality planning is now as essential as manufacturing planning. The process is now fairly standardised, thanks to TS 16949 & ISO 9001.

This module gives a comprehensive understanding of product & process quality planning from product development to production phases.

Contents

APQP

- How to define Key Characteristics
- APQP documentation
- Overview of product lifecycle
- Usage of quality techniques in different phases

PPAP

- Importance & methodology of PPAP
